

second terminals formed on an opposite side of the flexible board from the first terminals and electrically connected with the panel terminals, the first terminals and the second terminals being electrically interconnected through the through holes, each first terminal being formed wider than a corresponding one of the second terminals.

REMARKS

Upon review of the allowed claims, it was determined that claim 1 should be amended so as to read better and to be more consistent with allowed claim 18. This proposed amendment was discussed with Examiner Chowdhury on December 7, 2004 and he indicated that he would allow entry of the Amendment to claim 1 presented herein.

If the Examiner believes that personal contact would be advantageous to the disposition of this case he is requested to call the undersigned at his earliest convenience.

Respectfully submitted,

Dated: Jan 5, 2005
